

# Electrical Safety

## E-Learning

The course provides information on how to safely use electrical appliances within the workplace.

**30** minutes

Online Learning

Institution of Occupational  
Safety and Health

### About the course

Our online training helps delegates work towards legal compliance with current legislation and also how to react in an emergency and deal with electrical injuries and burns.

### Available in over 35 languages

Our courses are machine translated\* into a variety of popular International languages, so regardless of location or language preference, we've got you covered. Our machine translated content includes the translation of course transcripts and test questions.

\*Content which is not English may be machine translated and is for assistive purposes only. We cannot guarantee the accuracy of translations.

### Who should attend

This course is suitable for delegates who work with electrical appliances within their workplace.

Electricity is the main cause of over 15,000 fires per year, so it is apparent that there is an element of danger associated with its use. For this reason, it is essential that those who use electrical appliances at work understand how to safely use and maintain these devices.

### Course syllabus

The course modules cover:

- Working safely with electricity
- Injuries and emergency procedures
- Electricity and the law.

### Certification

Delegates will receive a HSS printable certificate in Electrical Safety upon completion of the course.

This course is approved and accredited by RoSPA & IOSH.
